# RunIIb Trigger: News

- **Project Acquisition plan approved**
  - **This means we can spend equipment money in FY03**
  - **(R&D money was OK to spend before)**
- **MOU's**
  - **Most trigger projects are non-FNAL based, and need MOU's to spend equipment money**
  - **Only MOU submitted so far is Boston Univ.**
- **132 ns**
  - **Not excluded, but…**
  - **BD plans to "do no further work" on 132 implementation**
  - **No design changes at this time; keep 132 capability**

News (cont)

- ## Schedule status
  - ◆ "statussing" is now a regular monthly ritual
  - ◆ L3 managers (and others) should expect to assess each month the status of each current task
  - ◆ Several important task 100% complete
    - ▲ ADF prototype design (24 Jan 03)
    - ▲ TAB prototype design (28 Jan 03)
    - ▲ Analog splitter designed, built, tested, installed (17 Jan 03)
    - ▲ Cal-trk MTFB prototype design (31 Jan 03)
    - ▲ Prototype L1cal trigger algorithm (17 Jan 03)
    - ▲ Prototype CTT algorithm (21 Jan 03)
    - ▲ VTM production (Jan 03)
  - ◆ Some delays w.r.t. aggressive schedule (need to be watched/mitigated)
    - ▲ L1cal prototype designs (ADF, TAB)
    - ▲ UAZ MOU (delays production items)
